

## The 411 on angioplasty

\*\*\*SOT\*\*\*

**Dr. Tariq Enezate [tah-REEK // EN-eh-zaht], cardiologist at OSF HealthCare in Urbana, Illinois**

“We use a very small catheter, which is like a long tube, which goes all the way up to the heart.” (:07)

\*\*\*SOT\*\*\*

**Craig Webb, patient at OSF HealthCare in Urbana, Illinois**

“The communication with the patient about why you’re here, what’s going to happen, when we’re going to do stuff. And [the OSF Mission Partners] pretty much stick to that schedule.” (:09)

\*\*\*SOT\*\*\*

**Dr. Tariq Enezate [tah-REEK // EN-eh-zaht], cardiologist at OSF HealthCare in Urbana, Illinois**

“If the patient is having sudden chest pain, they’ve never had it before, they don’t know what it is, I think it’s time to seek medical advice and go to the ER.” (:13)

\*\*\*SOT\*\*\*

**Dr. Tariq Enezate [tah-REEK // EN-eh-zaht], cardiologist at OSF HealthCare in Urbana, Illinois**

“If the patient has been having some chest tightness for a long time, it’s predictable. They know ‘Okay, if I walk three blocks, I feel it. I have to slow down.’ Maybe seek advice with primary care first.” (:17)

\*\*\*SOT\*\*\*

**Craig Webb, patient at OSF HealthCare in Urbana, Illinois**

“Don’t wait until you can’t go or you have to call an ambulance. When you don’t feel right, go to the emergency room and get checked out. You’re better off going and saying ‘There’s nothing wrong’ than not having that expertise available.” (:16)
