

Transcript of Media Clips for OSF partners for mobile CT-PET imaging

Derrick Fraiser-President OSF HealthCare Saint James -John Albrecht Medical Center

"In our community, access to timely diagnostic equipment can make a real difference. We can evaluate quickly for our patients. Mobile MRI and PET CT allow for advanced imaging much closer to home. This means shorter travel time, fewer delays and a more convenient experience for patients and their families, especially those that struggle with transportation and we have a lot of that in this community." (:25)

Kate Barth, vice president, OnDemand Services, and chief nursing officer, OSF OnCall

Bringing enhanced imaging closer to home for our communities, we are living our Mission in a real and meaningful way. (:08)
