

Advances in radiation treatment transform cancer care

ANCHOR LEDE

Cancer care can be a trying time. But radiation treatment – where precise radiation is delivered outside your body to shrink tumors – has come a long way, making things safer and more convenient.

TAKE VO

Doctor Neha Sharma is a cancer doctor who provides care at OSF HealthCare. She says treatment time and side effects have improved.

SOT

Dr. Neha Sharma (NAY-ha // SHAR-mah)
radiation oncologist at OSF HealthCare

“We’re able to prevent some of the side effects we saw in the past. One example is breast cancer. We’re able to avoid normal tissue and organs like the heart and lungs much more now with the equipment we use. We’re able to prevent side effects to the heart and lungs, or they are much less common.” (:23)

VO TAG

Doctor Sharma encourages you to talk to your cancer doctor about all options.
