

Roxanna Crosser – OSF HealthCare Western Region CEO

Great recognition:

It really is incredible how well our critical access hospitals do within our OSF Ministry specifically this award was given to both OSF Holy Family and also OSF Saint Luke Medical Center and OSF Saint Paul Medical Center. All three of them incredible remarks that were given to them both for clinical outcomes and patient experience. It's really good to know that in our rural markets that our organizations do so well in the delivery of care for patients.

Communities appreciate these hospitals:

Those particular communities really look at their hospitals as their place for healthcare both when they need something immediate and access to their primary care physicians and having that local mean so much but they also know that has to be incredible great care and we know that with OSF healthcare and the name and what is occurring in those communities we're very proud that were able to deliver that locally.
