

A better chance to survive a stroke

SOT

Leslie Ingold, OSF HealthCare stroke coordinator

"Getting to the hospital quickly – within four and a half hours of your onset of symptoms – is important."
(:04)

SOT

Leslie Ingold, OSF HealthCare stroke coordinator

"It has a lower cost. It's something providers can mix much, much quicker. And it's given quickly in an IV push over five to 10 seconds, and we're done." (:09)

SOT

Leslie Ingold, OSF HealthCare stroke coordinator

"The quicker we can get oxygen flowing back into that brain tissue, the better recovery the person is going to have." (:05)

SOT

Leslie Ingold, OSF HealthCare stroke coordinator

"We always tell people they really need to be on top of their treatment. The signs and symptoms of a possible second stroke may not be the same as the first. In fact, they could be completely different. It just depends on what part of the brain the stroke affects." (:15)
