(Bloomington, IL | January 16, 2020) - OSF HealthCare is excited to announce the opening of its newest [OSF Urgo](#). The new, modern urgent care clinic is located at 508 IAA Drive in Bloomington and opens to patients on Tuesday, January 21, 2020.

OSF Urgo builds on current primary care services offered through OSF HealthCare. They are in convenient locations near neighborhoods and shopping, areas where, historically, health care providers have not been located. The new IAA drive location is the third OSF Urgo in the Bloomington-Normal community. The others are located on Greenbriar Drive and Bradford Lane, both in Normal.

“OSF Urgo embraces a modern urgent care concept. It is designed for patients who want high-quality care quickly, so that they can get on with their busy lives,” said Jennifer Junis, Senior Vice President of Digital Health, OSF HealthCare. “It’s something new and fresh that allows each individual to access care in a way that fits them in their healthcare journey. We aim to be where you live, work and play.”

Each OSF Urgo is staffed by experienced Care Guides, a radiology technologist and one advanced practice provider. The Care Guides stay with the patient throughout the visit.

OSF Urgo providers deliver basic urgent care services such as treatment for cold, cough, flu, sprains, minor lacerations and fractures, sports physicals, urinary tract and upper respiratory infections and more. The sites will have x-ray and diagnostic laboratory services available.

All OSF Urgo locations are open 365 days a year from 8 a.m. – 8 p.m. for patients of all ages. Walk-in or schedule an appointment online through www.osfurgo.org. Insurance is accepted.
