Clare can screen and educate

She will walk you through whatever you may need. So, if you have questions, concerns, need information, general resources or if you believe you may have symptoms, she can help guide our community members through that process.”

Clare is one of several digital tools that OSF HealthCare will use to reduce the spread

“Using innovative solutions is what we do and it’s really the direction we’re taking this with digital health. We feel like that is a very important mechanism to protect our community and slow the spread of this virus.”

Digital tools can prevent some patients from having to go to a facility

“Our highest priority at this time is keeping our community members and caregivers and employees internally safe. So decreasing the spread of an infection by trying to triage patients on the front end before they come and receive care is really how we’re going to slow the spread of an infection like this.”
