Stacie Schwab, mother of child at OSF HealthCare Children's Hospital of Illinois

"It's amazing. OSF has truly been a blessing for us and for Ellie." (:07)

"It's amazing. It helps her learn and it keeps her mind off of all the medical things she needs to help her grow." (:10)

"As she's grown older and had to be in the hospital, they always have someone come in and make sure she has some kind of activity she could do and there's a huge playroom down the hall that she absolutely loves." (:10)

Sister M. Pieta, an engineer at OSF Jump Trading Simulation & Education Center

"Right now, these two liquids are interacting and it's gonna change color on us in a little bit of time. It's actually producing heat," she explains as she leads Ellie to feel the bottom of the mold. "Feel the bottom of the cup. Feel that? That feels warm."(:20)

"We want them to be able to find out where they can best serve the Lord and the world and where they're called to and whether that's in health care – whether as a doctor or nurse or as a lab tech or over with us in Innovation, whatever that may be, whether that's clinical or non-clinical, a lot of times they find their place I health care."(:21)

Nine year-old Ellie Schwab, patient with spina bifida at OSF Children's Hospital of Illinois

"I like to paint. I like to draw, color; pretty much anything that involves art I like to do."
