

BROADCAST- Jump Simulation experts bring training to OSF St. Joseph Medical Center Family Medicine medical residents

ANCHOR LEAD IN: First year medical residents at OSF HealthCare St. Joseph Medical Center in Bloomington received simulation training from experts at Jump Simulation in Peoria for two of the most complex but common procedures.

Intubating a patient or inserting a central line near the heart for volumes of IV fluids are complex, high risk procedures that TV medical dramas make look easy. But, Family Medicine residents don't do them every day. Dr. Jillian Hanson felt more confident after the simulation ...

SOT-JILLIAN HANSON

"Being able to have these manikins with the ultrasound and multiple times to practice throughout the morning has definitely helped but we have lots left to go in residency." (:12)

Jump Simulation Medical Director Lisa Baker says creating simulations that allow for repetition and mistakes in a safe environment for such challenging procedures is critically important for patient safety.
