

**Dr. Stephen Hippler, Chief Clinical Officer, OSF HealthCare**

**Don't really know how COVID-19 is transmitted**

I think the truth is we don't really know exactly how far it spreads, if it's infectious in the air, how infectious, and under what circumstances. :14

**Best course is to keep practicing prevention methods already in place**

The best thing we can do is wear our masks, physically distance at least 6 feet from people, and wash our hands. Then no matter what it turns out to be, it'll be the best way to protect ourselves and others. :16

**Dr. Mike Cruz, Chief Operating Officer, OSF HealthCare & Emergency Medicine Physician**

**All of the prevention work we have done for COVID-19 should help with flu season**

What we've learned from the southern hemisphere - as opposed to what we were anticipating two months ago which would've been this winter would be really awful - is that if we continue doing a lot of things we are already doing, they affected not only the coronavirus, whether it's respiratory, aerosolized, droplet, or contact, it will impact RSV, influenza, adenoviruses, and bacteria-like pneumonia's. :25
