ANCHOR LEDE

Though not everyone is sold on it, Doctor Philip Ovadia isn't shy about the carnivore diet. And the cardiothoracic surgeon at OSF HealthCare has studies and a remarkable personal experience to back it up. Tim Ditman of OSF has more.

A person on the carnivore diet consumes animal products like meat, dairy and eggs but abstains from plant products and processed food.

Yes, Doctor Ovadia admits this diet flies in the face of advice we've heard since we were kids. But it works for some.

**"There are no essential nutrients that are not available in animal products. The animal has eaten the fruits and vegetables. In many cases, ruminant animals like cows have multiple stomachs that are better able to digest the plant products and better able to extract the nutrients. Those nutrients end up in the animal meat." (:30)**
