

Bob Sehring – CEO, OSF HealthCare

Peoria Innovation Hub soundbites

Peoria Innovation Hub will work on social determinants of health

The Peoria Innovation Hub will be dedicated to finding solutions, solutions to challenges we face related to the wellness of diverse populations. Food and farming systems, and also transportation. And those often times are the issues that get in the way of those with clinical needs, medical needs, from participating in their own health. :25

The goal is to remove barriers to health care

One of the major components of OSF Innovation is working on finding new ways to engage our communities through new business models, care delivery, and preventative care. Core to our Mission, we want to remove barriers to health care for disadvantaged individuals and find effective solutions. It is our hope that by working with Discovery Partners Institute, and now with the Peoria Innovation hub, we will improve health for people across the state and beyond through expanded health care access and other options. :34
