

Jim Mormann, Chief Executive Officer Integrated Solutions & CIO

What it means be named Most Wired:

What it's continued to reaffirm for us, and for probably many of the many people industry, is giving us an opportunity to kind of take a step back from the work that we've done, to kind of prepare us to get closer to our patients, to basically ensure the fact that the products that we bring to the table are beneficial but at same time secure and protected for their best interest. :24

Transformational systems

The transformational components really talks about the next generation of what we're doing beyond those type of services, it's where we start utilizing artificial intelligence, were we start using predictive analytics, it's where we start using software applications that allow us to touch the consumer with where they're at versus inside of our world. :23

OSF is a leader?

I think it's important for us, I think it's important for our communities, I think it's important for the patients that they understand that we're doing everything we can, not only to secure their information, but to make sure that we're using it the best we possibly can for the care and treatment side. :15
